Button 9

Rudder

Hardware Installation

1. Turn off your computer
2. Plug the joystick connector into the 15-pin game controller port on the computer firmly.
3. Turn on your PC.
4. Enjoy your games.

Software Installation

Under Windows3.x or DOS: No driver or software is necessary for Windows3.x or DOS . Because the games read directly from the hardware . Configure the joystick only from the game individually.

Under Windows95/98 : Users can program the buttons from the driver – Genius Digital Software. The driver supports both DirectX v3 and DirectX v5. Just follow the instructions below , then you will be able to enjoy the most ultimate high technology joystick.

1. Make sure that you have connected your joystick to the computer.
2. Put the Setup disk (or CD) into you disk drive.

3. From Windows 95 / 98 , click on the **Start/ Run**
4. Specify the disk driver and type **setup** . For example , type **a:\setup** if you are using drive A
5. Follow the instructions on the driver to finish the software installation.
6. If any question about the *Genius Digital Software*, start the driver and press **[F1]** on the keyboard or click **[Help]** on the tool bar of the driver for further instructions and on-line help .

Features of the joystick

Digital joystick works efficiently in each game you play. It works in both analog or digital joystick mode .

1. **Eight programmable buttons** : Most games use button1 (the trigger) to fire weapons . Games often use other buttons to select , load weapons , assign targets ..and so on.
 - 1.1. **Three** conventional joystick-buttons on the handle (button 1-3)
 - 1.2. **Six** additional buttons on the base (button 4-9)
2. **Throttle**: The throttle gives you command over incremental game functions. To speed up , slow down , enjoy the feeling of different speed. It can also assign as thrust or altitude.
3. **Rudder** : Rudder gives you a 3D control besides conventional x-axis , and y-axis joystick movement . That will give you more rapid movement for dogfight.
4. **Hat switch**: Hat switch gives different and directional view sights to see the environment with a touch of the thumb. You can enjoy different view point as your wish.

Troubleshooting

Genius game controllers do not respond

1. You may use a **multiple game card** ---Remove or disable all but one of the cards . Refer to the game-card documentation for more information.
2. **Bent pins** ---Check for bent pins on the game-port connectors, and make sure all cable connectors are secure.
3. **Y-cable** ---Some Y-cable or joystick extension cables , do not support Genius Digital Controller . Plug the game controllers directly into the game-port and check it again.
4. If the game controllers still do not work , try to shut down the operation system for minutes , and restart , you might find it work fluently .

FEDERAL COMMUNICATIONS COMMISSION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Shielded interface cables must be used in order to comply with emission limits. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
