FCC ID: FSUGMZGH

Operational Description

| The transmitter of the EUT (Wireless Optical Mouse) is powered by 3V Battery. The receiver is |
|--|
| powered by host computer. Both transmitter and receiver use Integral Antenna. The output |
| power of this device is very low. Under normal use condition, the transmitter and the receiver are |
| quite close, so high EIRP power is neither necessary nor allowed because of interference. |
