## FCC ID: G6D202HHS

**Circuit Description** 

The <u>27.145</u>MHz crystal oscillator drives the base of <u>Q2</u> the final/buffer amplifier. The modulation provided by <u>IC</u>. The output of <u>Q2</u> has the matching network consisting of <u>L3, L4</u> and <u>C6</u> that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a  $\underline{41}$ cm long Metal antenna. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 3 Volt ("AA" size battery x 2) primary battery

## **Operation Descriptions**

The transmitter is a <u>remote control toy</u> operating at <u>27.145</u>MHz band. The transmitter is powered by a <u>3V</u> battery (<u>"AA" size battery x 2</u>) and the transmitting frequency is crystal controlled. There are <u>2 joystick</u> to control the forward reverse motor and director of movement. The operation is achieved by different combinations of form pulse modulating signal on the <u>27.145</u>MHz carrier frequency.

## Remarks:

The transmitter is a <u>2</u> joystick transmitter. The EUT continues to transmit while joystick is being pressed. It is joystick transmitter, Modulation by <u>IC</u>; and type is <u>Pulse</u> modulation.
