Alice, please provide the following information for New Bright Application FCC ID: G6D6277H in order to complete the application for Certification

1. The spectral plot does not clearly demonstrate bandedge compliance, per Section 15.235(b). Please provide a plot that shows the bandedges +/- 10 kHz, and that the emission level at these points complies with Section 15.209. Use the Marker-Delta function from the peak of the fundamental emission to the emission level outside of the 10 kHz guard bands, on either side of the authorized band, to demonstrate the required amount of attenuation.

Once this correct information is provided we will continue the processing of this application.

Best regards,

Chris Harvey
