RE: G8JVRT04

To Whom It May Concern:

AMCO Automated Systems, LLC hereby requests a change in identification of equipment pursuant to FCC section 2.933. The specific requirements of 2.933(b) are addressed below:

2.933(b)(1) - The original identification used on the equipment prior to the change in identification was G8JVRT02.

2.933(b)(2) - The date of the original grant of the equipment authorization was 02/05/2003.

2.933(b)(3) - The equipment bearing the modified identification is exactly the same as the original equipment; the FCC ID is the only change. Please note that since the original certification we have introduced an alternative plastic housing as a 2.1043(b)(1) Class 1 Permissive Change and new model name pursuant to 2.924 "Marketing of electrically identical equipment having multiple trade names and models or type numbers under the same FCC Identifier". Internal AMCO documentation is included as an exhibit with this application.

2.933(b)(4) - The original test results continue to be representative of and applicable to the equipment bearing the changed identification.

2.933(b)(5) - Photographs showing the exterior appearance of the equipment, including the operating controls available to the user and the identification label, are included as an exhibit with this application.

Sincerely,

A handwritten signature in black ink that reads "Thomas J. Wack". The signature is written in a cursive style with a large, sweeping "T" and "W".

Thomas J. Wack
Sr. Digital/Analog Engineer
