

Declarations

Date: Dec. 1st, 2010

To whom it may concern,

FCC ID: G95-TVA201

I, the undersigned, hereby declare that

1. All transmissions use only digital modulation techniques described in 47CFR 15.319(b).
2. The maximum antenna gain of the DECT is 2.04dBi
3. The EUT does not use the provisions of 47CFR 15.323 (c) (6)---random waiting mechanism is not used in this system.
4. The EUT use the same antennas for transmission and reception as for monitoring according to 15.323 (c)(8).
5. A system built with the EUT does not operate under the provisions of 47CFR 15.323 (c) (10) to test for deferral only in conjunction with a companion device.
6. A system built with the EUT does not operate under the provisions of 47CFR 15.323 (c) (11) enabling the access criteria check on the receive channel while in the presence of collocated interferers.
7. The device complies with the provisions of 47CFR 15.319(f). The device shall automatically discontinue transmission in case of either absence of information to transmit or operational failure. These provisions are not intended to preclude transmission of control and signaling information or use of repetitive codes used by certain digital technologies to complete frame or burst intervals. The following table explains the reaction of device in case of either absence of information to transmit or operational failure after a connection of its companion device is established.

If you have questions or need further information, please contact the undersigned.

Regards,

Name:

 RTO Chen
