REF: EKC-100201

The following modifications will be included in the FCC Part 15 report:

1. C60 was changed to 10 ohms, 0603 SMD resistor.
2. R5 was changed to 10 ohms, 0603 SMD resistor.

Please confirm that the final production unit of each 27903XX1-A and 27902XX1-A models will have the above modifications.

TF reply: This is to confirm you the final production unit complies with above modifications;

Your prompt attention and reply to the above is very much appreciated.

Regards,

Erlinda Canaria
