

STATEMENT OF SECURITY CODE

The cordless phone shall incorporate circuitry which makes use of a digital security code to provide protection against unintentional access to the public switched network by the base unit and unintentional ringing by the handset.

The 27925xxx-A use following approaches for facilitating variation in the geographic distribution of individual security code

1. We provide a mean for the user to readily select from among over 1,048,575 possible discrete digital Code

The 27925xxx-A has continuously the varied initial security code as each telephone is produced.

2. We provide a random code which is continuously varied among 1,048,575 discrete digital codes whenever the handset is placed on the cradle of base unit.
