Attention: Mr. Sid Sanders

Subject: FCC Part 15 Class "II" Permissive Change for
Thomson Inc. - Model 28031XXX-A
FCC ID: G9H2-8021A
Marstech Report No. 25256D

Gentlemen:

We are herewith submitting a Part 15 Class "II" Permissive Change filing on behalf of Thomson Inc. (formerly ATLINKS USA, Inc.), to cover additional Model 28031XXX-A [where the first two "XX" following the model number can be any letter which represents trade name, colour or packaging for marketing purposes; the third "X" can be any number from 1 to 4 representing the number of cordless handsets which may be used with the unit].

The Model 28031XXX-A is a 5.8GHz single-line, frequency hopping spread spectrum, cordless telephone with caller ID, answering machine, handset speakerphone and up to four multi-handset expandability. This model is identical to previously registered Model 28021XXX-A except model designation, addition of answering machine feature, different base main board and new power amp in base and handset RF modules.

In view of the above, all applicable tests in compliance with FCC Part 15 Rules and FCC DA 00-705 "Filing and Measurement Guidelines for Frequency Hopping Spread Spectrum Systems", were conducted on Model 28031XXX-A, with satisfactory results as shown in Exhibit A. The new power amp in base and handset RF modules also applies to previously registered Model 28021XXX-A (Marstech Project No. 26009).

The Model 28031XXX-A will also bear the same FCC ID: G9H2-8021A as original Model 28021XXX-A.

Please also note that ATLINKS USA, Inc. has changed their company name to Thomson Inc. (see attached letter for reference). Please have FCC update their records accordingly as well as Timco's, if it has not been done yet.

Please review this project at your earliest convenience and please do not hesitate to call us should any problem arise.

Yours very truly,

MARSTECH LIMITED
