

FCC ID: **GKR-TP00042AHB**

Dear Examiner,

We originally planned to re-use the original WLAN + BT module's conducted test results for this new host approval but then changed the plan and decided to re-test the WLAN + BT module in this host and the applicant is aware that they are responsible to make sure the WLAN + BT module's power in this host must comply with the host approval's granted output power. So the WLAN and BT module's output power listed on the test reports are in line with our FORM 731 listed output power. So for WLAN + BT portion, please just reference to the submitted reports 'RF120503C13_Compal_TP00042A_15.247.pdf' and 'RF120503C13-1_Compal_TP00042A_15.407.pdf'.

However, for the WAN module, we'll still re-use the original module's conducted test report, H5321_FCC_Test_Report_Part22-24_33376RRF003s.pdf, and provide the new radiated test results, report 12u14444-4C,

Best Regards

Chi Tsou
UL CCS
