Columbia, MD 21046

From: Compal Electronics Inc
No.581 & 581-1, Ruiguang Rd., Neihu District, Taipei city, 11492 Taiwan

Regarding: Different is the enclosure but PCB layout not change for FCC ID: GKR402550

To Whom It May Concern,

We, Compal Electronics Inc, declare on our role responsibility for the product of model MP21-ARGON-C.

The differences between model MP21-ARGON-C and model MP10-ARGON-C are as below:
Model MP21-ARGON-C and MP10-ARGON-C are shared the same mainboard circuit, while model MP10-ARGON-C is independent customer version.

According to KDB 484596 D01, "different devices may reference or reuse EMC and radio parameter test data from the application records of a similar device, for test reduction purposes."

In this case, the enclosure, size of the device panel and antenna gain has been modify for business purposes from the original EUT (Original FCC: GKR402547), the different from the previous case while the all other functions are unchanged.

Therefore, the current EUT (New FCC: GKR402550) was assessed and the data can be reused. Please reference KDB484596 D01 for more information.

Except listings above, all others are the same as previous version.
All data will be reused except the data of Radiated emission, conduction and output power.

For more details, please refer to the Reference section and the Spot check sections in the Reuse Data Test Report.

Sincerely,

A handwritten signature in blue ink that reads "Joyce Ting".
