VS500 Confidential

Agent Auth.

FCC ID

Request Let... Letter.pdf (380 KB...BEL(revised).pdf (55

Hi Chris,

Here are the answers.

1. The Label location exhibit shows the placement of the FCC ID label on the battery. The FCC ID label must not be located on a removable part of the product. The label is allowed to be located inside the battery compartment as long as it is located on a permanent part of the device. Please provide an updated label location exhibit. <answer>pls see revised label.

2. The Grantee for this application is Compal Electronics, Inc. (Grantee Code GKR), however the exhibits for Confidentiality and Agent Authorization for this application is for Vacom Wireless, Inc. <answer>pls see revised letters as attached.

3. Although not required for the Pt. 22 portion of this device, the User's Manual should contain the required information for the Receiver and digital portions of this handset in accordance with FCC 15.21, 15.19 and 15.105. As a TCB we are asked to ensure that this information is provided to the user. <answer>since EUT is a cellphone. We don't think it is necessary to put the statemet of FCC 15.21, 15.19 and 15.105
in the user manual.

Thanks,

Claire
