RE: FCC ID: GM37525BTB ATCB003280

Attention: Daniel Lee

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

- 1. Please note that the application documentation gives no idea as to why the PC2 is being performed. Please provide a letter clearly stating what the PC2 is for.
- 2. Please note that the attestation letter states that SAR is not needed, but the SAR report has been provided. Please explain.
- 3. Please note that the information indicates that three transmitters exist in what ever device is the host. As the BT is the LMA for the Host, are the other two transmitter's modular approvals? If so, please provide the FCC ID numbers for these modules. Please show where the statement "Contains FCC ID"xxxxx" is located on the host for the other two modules. Please fully explain the situation and configuration of this application.
- 4. Please provide a test report for this PC2.
- 5. Please provide test setup photos for this device.
- 6. Please note that based on the responses to the above comments, more comments may arise.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
