

3.3.2 The Taskbar

A taskbar at the bottom of the screen displays icons through which you can view the security level and battery capacity. A unit equipped with a Bluetooth radio displays the appropriate icon in the taskbar. A hand-held attached to a charger, cradle or docking station displays the associated icon, and so on.

The taskbar also displays active modifier keys – <SHIFT>, <ALT>, <CTRL>, <ORANGE> and <BLUE>. Keys that have been locked “on” are displayed in *uppercase* letters.

Using The Taskbar

- Tap on an icon to display the associated dialogue box. For example, tapping on the battery icon displays the Power Properties dialogue box that indicates the current battery capacity.

3.4 The Start Menu

The Start Menu lists operations you can access and work with. It is available from the startup desktop or from within any application.

To display the menu:

- Tap on the Windows® Start button in the taskbar. Tap on the item in the menu with which you want to work.

Note: If your touchscreen is disabled, press <BLUE> <.>.

The Desktop

Choosing Desktop from the Start Menu displays the desktop.

Security Settings

To assign a security level:

- Choose Security from the Start Menu.

- Select a security level from the dialogue box, and type the appropriate password.

To change the password:

Note: Keep in mind that this is the same password as that assigned through the Password control panel applet.

- Choose a security level, and enter the existing password in the Password field.
- Choose the Set Password button.

In the Password Properties dialogue box:

- Type the new password in the Password: text box, and retype the new password in the Confirm Password: text box.

The System Tray

Note: *You'll only need to use this option to access the icons in the taskbar if your touchscreen has been disabled. If your touchscreen is working, you can tap on the taskbar icons to display associated dialogue boxes.*

The System Tray option allows keyboard access to the icons in the taskbar at the bottom of the screen. The taskbar displays indicators such as a battery capacity gauge and the security level. These indicators are attached to dialogue boxes that provide additional information.

- Choose System Tray from the Start Menu.

When System Tray is chosen, the taskbar icons become accessible. To display the dialogue box attached to an icon:

- Use the <LEFT> and <RIGHT> arrow keys to highlight the icon with which you want to work.
- Press <ENTER/ON> to display the associated dialogue box.

The Task Manager

The Task Manager option allows you to switch to another task or to end an active task. To display the task manager window:

- Tap on Task Manager in the Start Menu.

Cycle Tasks

When Cycle Tasks is selected (and the Task Manager is not open), you can cycle through active applications. To cycle to the next active task:

- Tap on Cycle Tasks in the Start Menu.

Power Info

Selecting Power Info from the Start Menu displays the Power Properties dialogue box. This dialogue box indicates the remaining charge capacity of the battery.

Programs

Program displays a sub-menu of options with which you can work access applications.

Settings

Tapping on **Settings** displays a sub-menu of options with which you can access the Control Panel applets, configure your radio (Network and Dial-up Connections) and customize the Taskbar and Start Menu.

Run

Choosing the **Run** option displays a dialogue box in which you can enter the name of the program, folder or document you want to open.

Shutdown

Tapping on **Shut**down displays options for a shutdown.

Note: This menu varies depending on the security level. At **User** level, the Shutdown sub-menu is replaced with a single option – Suspend. A sub-menu is not available.

Teklogix security level provides another option – Bootloader. This option behaves like cold-reset, except that the unit launches Bootloader rather than Windows CE .NET.

3.5 Using A Dialogue Box

Note: Tap the stylus on a dialogue box element to select or deselect it, display a dropdown menu and so on. To use the keyboard, refer to “Navigating Using The Keyboard” on page 19.

Dialogue boxes like the samples in this section contain one or more of the following elements:

Tab: Tabs separate different elements of a dialogue box. Tap the stylus on the tab with which you want to work.

Textbox: A textbox requires that you type information. Tap on the textbox you want to work with to highlight it, and then type the appropriate information.

Dropdown: This type of menu is identified by up and down arrows next to the dropdown menu to indicate that additional options are available. Tap on the menu to highlight it, and tap on the arrows attached to the menu to cycle through the options.

Checkbox: This box allows you to select or deselect an option. To select (✓) or deselect a checkbox, tap the stylus in the checkbox.

Radio buttons: These buttons allow you to choose from a number of options. For example, in the sample screen under section 3.5 on page 26, you can choose to ‘Obtain an IP address via DHCP’ or ‘Specify an IP address’. Tap on a radio button to activate the option next to it.

Buttons: This type of button allows you to ‘Save’, ‘Delete’ and so on the options you’ve chosen in a dialogue box. Tap on the button you want to execute.

Saving Your Choices: Once you’ve made all your changes, tap on the <OK> button to save your changes and exit the window.

Note: If an item in a dialogue box is displayed in grey text, the item is not currently available.

4. General Maintenance

4.1 Caring For The Touchscreen

The touchscreen can be permanently damaged by harsh chemicals and is susceptible to abrasions and scratches. Using sharp objects on the touchscreen can scratch or cut the plastic or crack the internal conductive coating.

Protect the touchscreen from the following chemicals:

- mustard,
- sodium hydroxide,
- concentrated caustic solutions,
- benzyl alcohol, and
- concentrated miner acids.

If touchscreens are used in harsh environments, apply disposable screen protectors to dramatically extend the life of the touchscreen.

4.2 Cleaning The WORKABOUT PRO

Important: Do not immerse the unit in water. Dampen a soft cloth with mild detergent to wipe the unit clean.

- Use ***only*** mild detergent or soapy water to clean the unit.
- Avoid abrasive cleaners, solvents or strong chemicals. The plastic case is susceptible to harsh chemicals. The plastic is partially soluble in oils, mineral spirits and gasoline. The plastic slowly decomposes in strong alkaline solutions.
- To clean ink marks from the keypad and touchscreen, use isopropyl alcohol.

▶ RF Exposure Information (SAR)

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the device as reported to the FCC when tested for use when worn on the body, as described in this user guide, is 0.102 W/kg. (Body-worn measurements differ among device models, depending upon available enhancements and FCC requirements.)

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this device is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: GM37525MGSM.

For body worn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines.
