Newberry, Florida

**Subject: Class II Permissive Change under FCC 47 CFR, Parts 2 and 90 (Subpart I) - Non-Broadcast Radio Transceivers Operating in the frequency band 435-470 MHz.**

**Applicant: Psion Teklogix Inc.**  
**Product: UHF Radio Transceiver Module**  
**Model: RA1001**  
**FCC ID: GM3RA1001**

Dear Sir/Madam,

As appointed agent for Psion Teklogix Inc., we would like to submit the application for certification of the above product. Please review all required documents uploaded to your E-Filing web site.

This Class II Permissive change involved the addition of 25 kHz channel spacing operation and it is implemented with manufacturer software. The radio frequency, RF output power and circuitry is the same (design and construction is identical) as the original filing.

The following tests were performed to demonstrate continue compliance with this enabled function:

- 1) RF Output Power
- 2) 99% Occupied Bandwidth
- 3) Emission Mask
- 4) Modulation Limiting

If you have any queries, please do not hesitate to contact us.

Yours truly,

Tri Minh Luu, P. Eng.,  
V.P., Engineering
