FEDERAL COMMUNICATIONS COMMISSION STATEMENT
You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.
This Equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) rules. These limits are designed to provide reasonable protection against harmful interference in

---

a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into and outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Operation is subject to the following two conditions:
1) this device may not cause interference and
2) this device must accept any interference, including interference that may cause undesired operation of the device.

FCC RF Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Introduction
Thank you for purchasing the Bluetooth Keyboard
This User's Manual contains information that will help to operate the device as well as answering questions about certain special keys and buttons. Please keep this manual in a safe place for future reference.

Technical Specifications
Keyboard devices: use HID coordination Bluetooth devices
Keyboard Size: 251.3 x 182.2 x 6.0 mm
Battery Capacity: 300 mAh
Keyboard layout: 80 keys
Weight: 600g
Working voltage: 3.3-4.2 V
Working current: under 15 mA
Standby current: 2.5-3.1 mA
Sleep current: under 60 uA
Charging current: 150 mA
Charging time: about 2.5hrs
Awaken way: Press key
Continuous usage: about 20 hrs
