

Question 1

Please see new SAR report. Note that this report supercedes the originally submitted report in all aspects. The updated section is section 5.6.

Question 2

Car-Kit Clarification - in this instance, a car-kit is defined as a hands-free device such as a headset or an external speaker/microphone. This product does not have the capability to be connected to an external antenna that would be subject to MPE requirements. None of the connectors on the bottom of the product can be used as an RF connection.

Additionally, Nokia is including updated User Guide pages for completeness.
