

- 2) Tuning frequency range to be placed on the grant. The frequency range listed in the EAS TECH SPECS should be tuning range. The numbers presented in the TECH SPECS appear to be a range greater than the tuning range listed in the operational description under exhibit 10. Please clarify.

The tuning ranges are:

for all part 22 modes of operation 824 - 849 MHz

for part 24 mode of operation 1850 - 1910 MHz
