RE: Visonic Technologies (1993) Ltd.

FCC ID: GSA-ETC00433

After a review of the submitted information for FCC, I have a few comments on the above referenced Application.

- 1) FYI...RF transmissions upon entering and LF field are stated in the manual to transmit 4 pulses over 1.2 seconds and supported in the test report to be 1.5 seconds. Since this transmission is > 1 second duration, it is not subject to 15.231(e) and must be 15.231(a) transmission. Therefore note that most emissions would fall under 15.231(a), while others are 15.231(e). However, please explain if power level varies between various modes are always the same or not.

Timothy R. Johnson
Examining Engineer
