RE: Visonic Technologies

FCC ID: GSA-SPD2000NS

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) It is not completely apparent from the Operational Description that this device meets the operational requirements of 15.231(a). As an example, there is no description of the transmission-on parameters when an object is moved or when the cover is removed. You are reminded that device must maintain the 5 seconds-to-off requirement for 15.231(a)(1) once triggered. You are also reminded that the "emergency condition" provisions of 15.231(a)(4) do not apply to emergencies involving property – only emergencies where life is threatened. In addition, a more complete description of how the "supervisory status" message is transmitted to show compliance with total time duration of 15.231(a)(3). Kindly provide a more comprehensive Operational Description of this device's transmission features.
- 2.) Please provide an Agent Authorization letter allowing Hermon Labs to act on behalf of Visonic.
- 3.) If possible, please provide larger, clearer photographs of the Test Setup. The ones supplied are barely readable.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
