RE: Visonic Technologies, Ltd.

FCC ID: GSA-SPD2000NS

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Measurements below 1 GHz should be done on a approved OAT's or similar site. Test photographs appear to suggest this was only done in a anechoic facility. Please review.
- 2) Can you explain the following from the operational description :  
"Thus when a protected asset is moved without authorization, ....."  
Can you explain how the device/tag understands it is moved with authorization? This will help to define an "alarm condition" rather than simply transmitting every time it is moved.

Timothy R. Johnson  
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
