In reply to e-mail dated April 15, 2002

Dear Mr. Ward,

Below are the answers to your questions.

FCC ID: GSAMCM140.

1. The antenna is an integral part of the transmitter module RFT3A. Please find separate photographs of this module in "RFT 3A photographs" file, submitted via "Add to existing application", Internal photographs folder on April 24, 2002. This antenna can also be seen on photograph N.3 of "MCM internal photographs" file.

In addition please find the data sheet for this antenna in "Coil antenna for RFT 3A" file, submitted via "Add to existing application", Additional information folder on April 24, 2002.

2. Please find the updated test report (with inserted Plots A3, A4 showing the duty cycle measurements, and duty cycle calculation below the plot), submitted via "Add to existing application" Test report folder on April 24, 2002.

If necessary, I can send 10 plots more, which show duty cycle detailed calculation step by step.

3. The deactivation of transmitter after a two-second transmission is provided by software.

Hope, you find these answers satisfactory.

With great respect,

Valeria
