Errol Chang
EChang@FCC.gov
FCC Application Processing Branch

Dear Mr. Chang,

I have received your request for information (Correspondence Reference Number: 6827) regarding an application for Visonic Inc. (FCC ID: GSAMCT104, 731 confirmation number: EA93304).

I understand that you are requesting a schematic diagram. You should be able to find the schematic diagrams on pages 74 thru 82 of the technical report that was submitted for certification.

I can only think of two possibilities that may be the problem;

- 1.) The report may have been sent to you with those pages missing. If that is the case, I will upload them to you. But first I would like you to confirm that you do not have them.

or,

- 2.) The schematics on those pages may be unacceptable to you. If this is the case, then I must ask what the differences are from this application and two previous applications that have already been approved by the FCC for similar Visonic certifications (FCC IDs: GSAMCT134 and GSAMCT231).

Let me know as soon as possible what the issue is. My client is very eager to finish the certification process.

Best regards,

Paul Hare
