May 17, 2005

RE: Visonic Ltd.

FCC ID: GSAMCT212

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The updated timing information provided states the number of messages of blocks can vary between 6 to 21 messages and also the spacing between messages can vary between 2 to 17 spaces. Please kindly explain how this affects the worse case average duty factor applied in the original report. Please explain and/or correct as necessary.

Timothy R. Johnson
Examining Engineer
