Charging Cable   x 1
   50cm long USB to Micro USB - 5V/2A

User Manual   x 1

⚠ CAUTION

Some phones may block the wireless charging.

Your device will have an internal amplifier and if it is playing digital files like MP3s, it will also have an integrated DAC (Digital Audio Converter). If you turn the volume up to 100%, your device will be sending a distorted signal. To avoid this, and to get the best quality from the speaker, we recommend that you do not turn your device any higher than 90% volume. Some devices output higher than others, so you may need to reduce the volume if you experience distortion.

Do not place other materials, like metal objects, magnets, and magnetic strip cards, between the mobile device and the wireless charge pad.

When the mobile device is not placed on the charging surface accurately, your mobile device may not charge properly. If you use the wireless charger in areas with weak network coverage, you may lose your network reception.

Please do not expose this device to moisture or heat sources. This is not a toy, not suitable for children under the age of 7.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.
