RE: Monarch Marketing Systems, Inc, dba Paxar Corporation

FCC ID: GU67410-02

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide a photograph of the top of the PCMCIA Card with ALL shields removed.
- 2) The Label includes the FCC logo and the phrases "Tested to Comply with FCC Standards" and "For Office Use Only". These phrases are only necessary for Class B PC peripheral devices authorized using a DoC approval. Class A PC peripherals are authorized using a verification authorization. This labeling is therefore not applicable and should be removed. Please provide an updated label.
- 3) Please explain the "EtherWind-Plus" description given in the operational description. This mentions a card with an integrated antenna and output power of 1000 mW (1 Watt). The EUT application submitted includes a PCMCIA card with external antennas and about 37 mW. Please explain.
- 4) FYI, Table 5.3 shows one reading at 1663 MHz that was taken with an Average detector. Please note that when an average limit is specified by the rules, there is also a limit on the peak emission that is 20 dB above the average limit (15.35(b)). Please be sure to include both peak and average measurements for future submittals unless the peak measurement supplied meets with the average limit.
- 5) FYI, the limit in tables 9.4-9.6 are sometimes listed with and without the negative sign.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
