

Re: Supersede request for FCC ID: [GV3M01002](#); Granted on 06/20/2007

To Whom It May Concern:

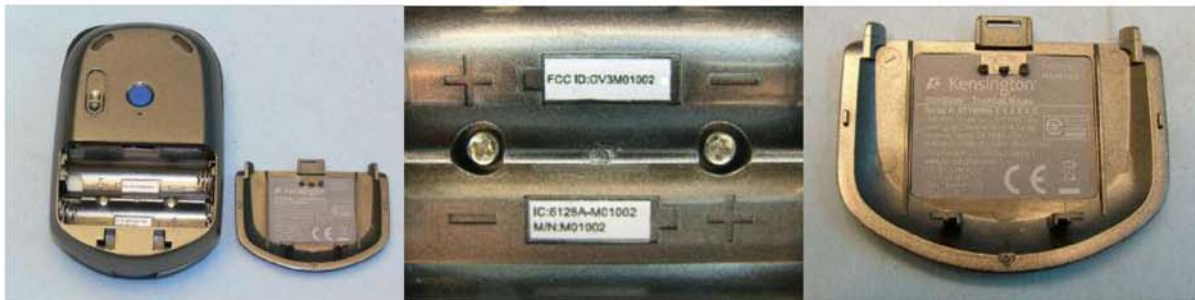

To resolve the burden of have two plastic strips attached in-between battery cover and the product body, we decided to add one more set of FCC ID inside the battery chamber in the future production of this model. The battery(s) will not be pre-installed in the battery chamber to make sure that the end-user can notice the ID location.

Please supersede the exhibit described as "Label \ Label Location" outlined below with red color. Thank you so much for your help.
