Subject: SAR Evaluation Exemption Compliance information

FCC ID: GV3M01287

IC: 6128A-M01287

Portable Exposure SAR Exemption

$f_{(GHz)} = 2.402$

Maximum e.r.p. power = 0.00032 W erp

Per RSS-102 Issue 4 Section 2.5.1 Exemption from Routine Evaluation Limits – SAR Evaluation

$f_{(GHz)} = 2.402$

Maximum e.r.p. power = 0.00032 W erp, which is less than 20mW, therefore SAR evaluation is not required.

Per FCC KDB 447498 D01 RF Exposure v05r01 Clause 4.3.1.1 SAR test exemption criteria

$\left[\frac{\text{max. power of channel, including tune-up tolerance, mW}}{\text{min. test separation distance, mm}} \right] \leq 3.0$

$f_{(GHz)}$ is the RF channel transmit frequency in GHz

Power and distance are rounded to the nearest mW and mm before calculation¹⁷

The result is rounded to one decimal place for comparison

[Ref: Clause 4.3.1.1]

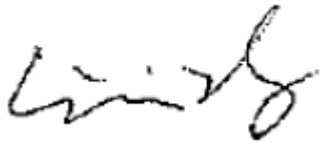

A test separation distance of 5 mm has been applied to the SAR test exclusion calculation.

$\left[\frac{0.32mW}{5, mm} \right] \left[\sqrt{2.402_{(GHz)}} \right] \leq 3.0$

0.10 ≤ 3.0 for 2.402GHz

Therefore, the device meets the FCC SAR exemption requirements.

Yours sincerely,
