

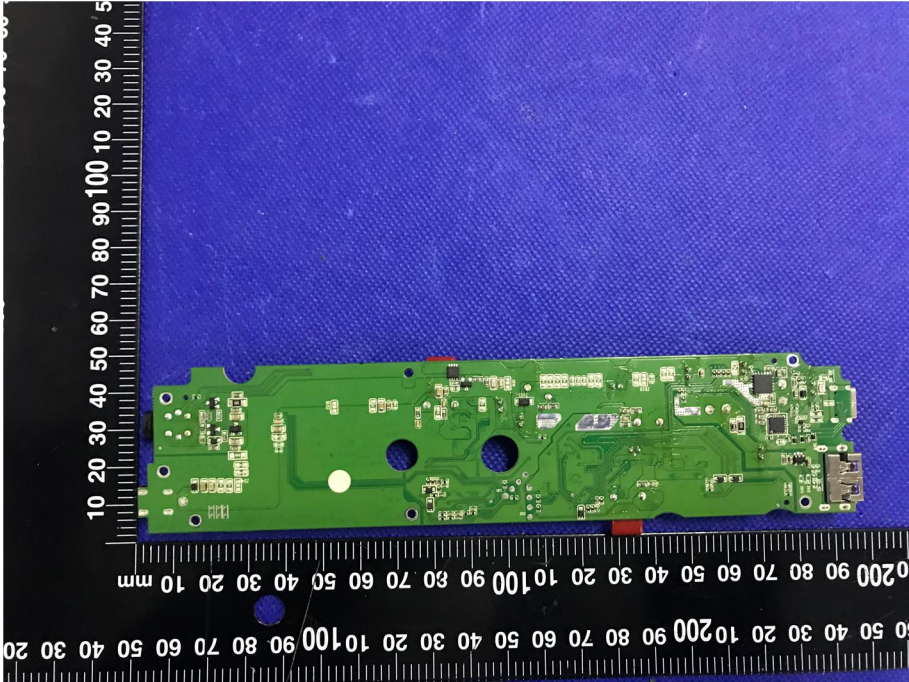

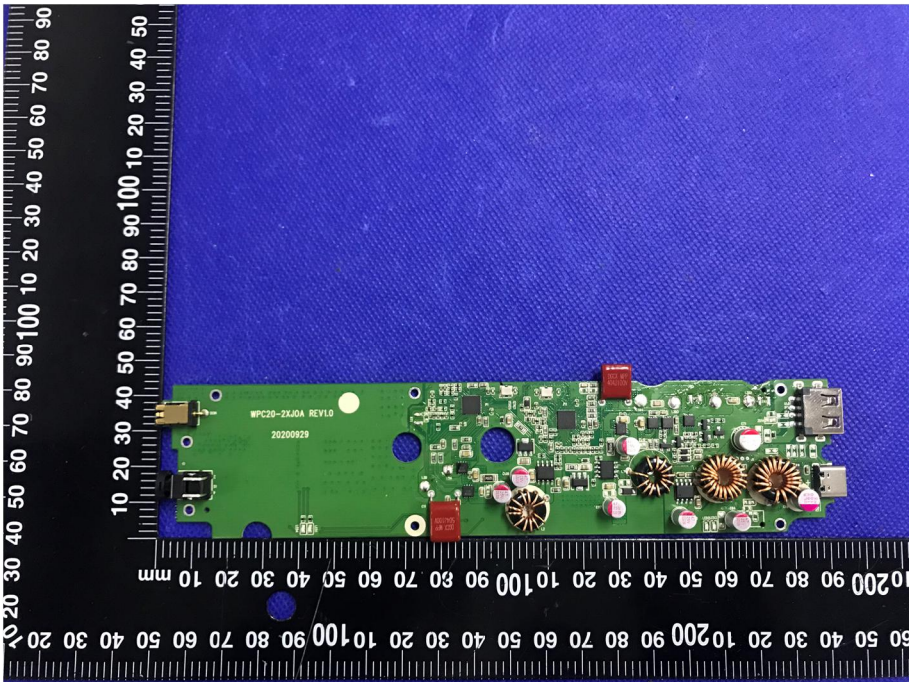

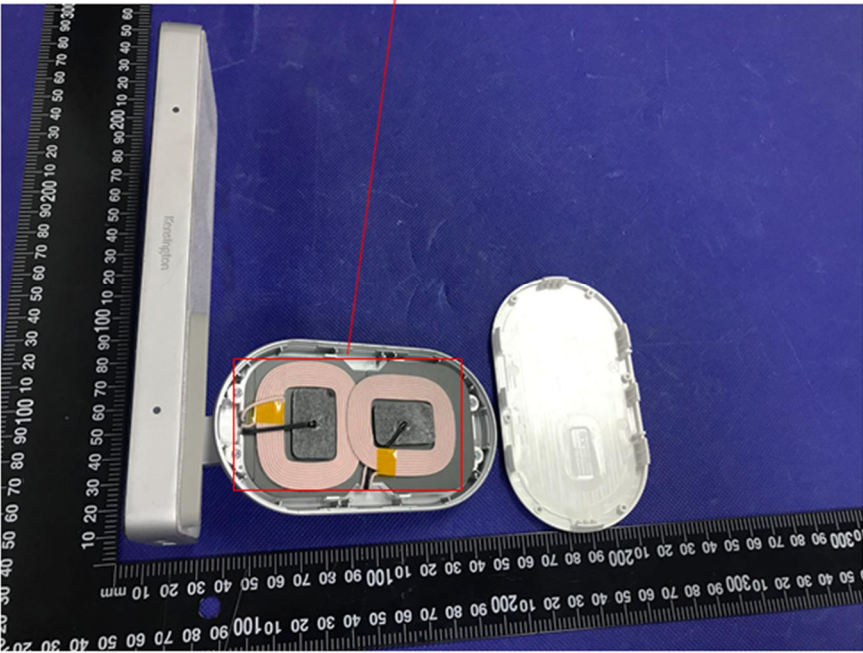

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>This photograph shows the internal components of the EUT housing from a top-down perspective. The white plastic housing is open, revealing a green printed circuit board (PCB) with various electronic components. A prominent feature is a large, circular, multi-layered coil structure. The PCB is populated with several surface-mount components, including resistors and capacitors. A black ribbon cable is connected to the board. The entire assembly is placed on a blue surface next to a black ruler with white markings for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm.</p>
<p>EUT Housing and Board View 2</p>	 <p>This photograph shows the internal components of the EUT housing from a different perspective, likely the bottom or side view. The white plastic housing is open, revealing the green PCB and its components. The circular coil structure is visible, along with various surface-mount components and a black ribbon cable. The assembly is placed on a blue surface next to a black ruler with white markings for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm.</p>

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The board is rectangular with rounded corners and features various electronic components, including integrated circuits, resistors, and capacitors. It is positioned against a blue background. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters. The ruler markings are visible on both the top and bottom edges of the image frame.</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of the same green PCB component, labeled 'Solder Board-Component View 2'. This view shows the underside of the board, which is populated with several large, cylindrical components, likely electrolytic capacitors, and other electronic components. The board is placed on a blue background. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters. The ruler markings are visible on both the top and bottom edges of the image frame.</p>

<p>Antenna View</p>	 <p>Wireless Charger Antenna</p> <p>This photograph shows the back cover of a device with the wireless charger antenna highlighted by a red box. The antenna is a circular, pinkish component with a central metal pad. A red line connects the label 'Wireless Charger Antenna' to this component. The back cover is placed on a blue surface next to a black ruler for scale.</p>
