FAX. (203) 882-4915

To whom it may concern,

This letter explains that the RF component module for WLCU301xxyy and WLCAXxyy (GX70101, 10282A-GX70101) was developed with Hubbell by and is being sourced from Lutron electronics. Accordingly, while Hubbell provided the schematics, block diagrams and details of the main product board and is getting the certification and listing, Lutron will be providing the required technical information for the RF portion of the product.

(xx is color and yy is for wire or mounting options that don't change the product)

Signed
