RE: FCC ID: H25PDTX1000S
Attention: James Carrington

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that as this is not a fixed licensed station, but rather a mobile device, rf exposure cannot be addressed at the time of licensing but instead must be addressed at the time of grant. Please also note that the MPE report suggests a 20 cm separation distance. Please correct the manual to include the necessary separation distance information for rf exposure.
2. Please note that the radiated spurious emissions test report does not indicate what method of measurement was used. While certain assumptions may be made, the data needs to clearly be identified. For example, it is not clear if TIA603 antenna substitution methods were used for radiated spurious emissions. Consequently, it is not known what the column headings really mean. Please provide information on the test methods used for radiated spurious emissions testing.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
