Mike,

This application does not appear to be within the scope of TCB approval because of the restrictions FCC currently has for TCBs approving equipment involved with RF Exposure. According to the way I read the rules, only Categorically Excluded licensed equipment (i.e. equipment under 1.5W conducted or EIRP) qualify with the exception of fixed devices. I am more than willing to advise you, or even file with the FCC on your behalf, but at the moment I would be doing both of us a disservice by continuing this review.

Attached are the basic documents all TCBs must use to see if a transmitter qualifies for TCB approval. These must be used in conjunction with 1.1307, 2.1091, 2.1093 and OET Bulletin 65. This equipment seems to qualify as a Transmitter Category VII device on both the TCB Exclusion List and TCB RF Exposure Procedure documents.

Give me a call if you need to discuss this further.

Bill
