Congratulations

Congratulations on your purchase of the BMH-10x Bluetooth[®] headset. This headset allows you to communicate wirelessly through your mobile phone and includes a built-in microphone and earphone. It uses Bluetooth[®] 1.2 technology, but is also compatible with mobile phones using Bluetooth[®] version 1.1 technology.

Your BMH-10x Bluetooth[®] headset uses a built-in Lithium Polymer rechargeable battery, which gives long life to weight ratio.

Note that any phones that you use with this headset must support the same profiles as your headset.

Package Contents

1. Bluetooth[®] headset (including ear hook)
2. AC adaptor
3. This user guide
4. Neck cord

Headset Features

The headset can be worn on either ear. Just clip the ear hook onto the preferred side.

Charging the internal battery

Before using your headset, please charge the internal battery. To charge the battery:

1. Connect the AC adaptor to an electrical outlet.
2. Plug the adaptor's connector into the charging port (see below).

3. While charging, the blue LED light will stay on. When charging is complete, the LED will switch off. You can then unplug the adaptor's connector from the headset and disconnect the adaptor from the electrical outlet.
4. Charging time is about 2 hours.

Switching the headset on or off

To switch on:

Press and hold the **talk key** for 3 seconds until the blue LED turns on.

To switch off:

Press and hold the **talk key** for 3 seconds until the orange LED flashes.

Pairing Procedure

Your BMH-10x *Bluetooth*[®] headset needs to be paired to your mobile phone before it can be used. This is a two part process; one part is carried out on the headset and the other is carried out on the mobile phone. Note that different mobile phones use a different method to go through the pairing process.

To pair your BMH-10x *Bluetooth*[®] headset:

1. With your headset turned off, press and hold the **talk key** for 6 seconds. The LED will alternate rapidly between blue and orange, which indicates that the headset is in pairing mode.
2. Use your phone's menu to search for *Bluetooth*[®] audio devices. The phone should indicate it has found the "BMH-10x" headset. Confirm that you want to pair your mobile phone and headset together. If you are unsure how to go through the pairing process on your mobile phone, please consult its user manual.
3. When asked for a pin key, enter: "0000". Your phone will confirm that pairing has been successful.

Note that there is usually a time limit to pair devices, for example 2 minutes.

Phone call use

Making a call from the mobile phone

While your mobile phone is paired with your headset, you can use the mobile phone to make phone calls in the same way as normal. The only difference will be that the earphone and microphone functions of the headset will be used instead of the phone's.

Voice dialing through the headset

In order to use the voice dial feature of your headset, your phone must support voice dialing and must have voice tags stored.

To use voice dialing:

1. Switch the headset on and pair it with your phone, if this is not already the case.
2. Press the **decrease volume key** up to 3 seconds
3. You will hear a short tone. Say the voice tag immediately.
4. Your phone will make the call.

Last number redial

When the headset is in standby mode (not in conversation), press the **talk key** three times within 1 second, and your phone will redial the last number that you called.

Note: This function only works on *Bluetooth*[®] phones that support the Hands-free profile

Answering a call

When someone calls you, a ring tone will sound in your headset. To answer the call, press the **talk key**.

Note that you can set your mobile phone to automatically answer calls, meaning that you do not even need to press the **talk key**. Please refer to your mobile phone's user guide for more information about this setting.

Call swap

Some mobile phones support call swap. This means that if you

receive a second call, you can put the first caller on hold while you speak to the second caller. If your phone supports this feature:

1. Press the **increase volume key** for 3 seconds to put the first caller on hold and answer the second call
2. When the second call has ended, the first caller will automatically be taken off hold.

Ending a call

During a call, press the **talk key** for 3 seconds to hang up. If the other person hangs up first, then the call will end automatically.

Rejecting a call

If you do not wish to accept a call, press and hold the **talk key** for 3 seconds.

Note: To use this function, your mobile phone must support the Hands-free profile.

Muting a call

During a conversation, press and hold the **decrease volume key** for 3 seconds. The headset, including the microphone, will mute. To cancel mute, press either the **increase** or **decrease volume key** once. You will hear two short tones per 3 seconds to remind you of the mute status, until canceling mute function.

Transferring a single call

When activating a call, you can double-click the **talk key** within 1 second to switch conversation between the BMH-100 headset and the mobile phone.

Adjusting the volume

The headset offers 6 pre-set volume levels.

- To increase the volume, press the **increase volume key**
- To decrease the volume, press the **decrease volume key**.

LED indications

When you turn the headset on, the LED will indicate the battery status.

- If the blue LED stays on solidly for 5 seconds, then the battery is sufficiently charged
- If the orange LED stays on solidly for 5 seconds, the battery needs to be recharged.

During normal use, if you see the orange LED flashing every 30 seconds, please recharge the battery as soon as possible.

Bluetooth® headset specification

Compatible with *Bluetooth*® Ver.1.1 or 1.2 devices

Maximum distance 30 Feet (10 meters)

Weight of headset Approximately 18 grams

Typical standby time up to 120 hours

Typical talk time up to 8 hours

Typical re-charge time 2 hours

Battery type Lithium Polymer 130 mAh
rechargeable

NOTE: Talk time and standby time vary depending on the mobile phone used.

Cautions

1. Always store the headset safely.
2. Avoid storage at temperatures below -25°C or above 70°C.
(Storage at high or low temperatures can degrade performance and reduce battery life.)
3. Avoid operating at temperatures below -10°C or above 50°C.
4. Do not expose the headset or any of its supplied parts to rain or other liquids.
5. Avoid humidity below 10% RH or above 95% RH.

Certification and safety approvals/general information

This product is CE, FCC, BQB marked. Please note that this product uses radio frequency bands not available for use within some areas of the EU. This product is intended to be used in Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, The Netherlands, Portugal, Spain, Sweden, United Kingdom and within EFTA in Iceland, Norway and Switzerland.

Users are not permitted to make changes or modify the device in any way. Changes or modifications not expressly approved by your distributor will void the users' authority to operate the equipment.
