

1. A parts list will be provided.
2. See #1
3. The difference between 3.85W and 4W is 0.17 dB. The operational description has been edited to replace the 8W reference.
4. The limit includes the antenna at the time of licensing. The conducted value plus the antenna gain must be below the limit.
5. The report has been edited to state that the notch filter was tuned to match the fundamental frequency.
6. The test has been performed again and the new data has been added.
7. The test has been performed again and the new data has been added.
8. RF exposure is addressed on page iii of the user's manual. There is now a comment about licensing of a repeater.
9. As this is a Part 90, I believe that you are looking for the label and/or manual to state the following: *This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.* Please confirm if this is the correct selection.
10. A cross reference for FCC part 90 to RSS-119 will be sent to ATCB.
11. See #8.
