**REPLACEMENT OF EAS EXHIBIT FILES**

- References:**   **A.   FCC ID: H4JVT-30**  
                      **B.   731 Confirmation Number: EA129897**

Although similar in appearance, the set of exhibit files uploaded 12/03/2004 contains versions that have been edited to reflect the correct equipment FCC ID: **H4JVT-30** for which the Class II Permissive Change is being requested. The first set of exhibit files uploaded 12/01/2004 erroneously indicated a new FCC ID: H4JAMP-2-150. The amended files were uploaded as a set, to ensure consistency. Several files in the amended set are identical to the original versions; however, to avoid any further confusion, all files uploaded 12/01/2004 should be deleted and all files uploaded **12/03/2004** should be used as the correct exhibits.

I apologize for the confusion and hope that the information provided here will help correct matters. In hindsight, I see that EAS direction to annotate the exhibit name with "AMENDED" referred to the name as entered in the on-line submission form, whereas I had interpreted it to mean the actual file name. If preferred, exhibit files can be uploaded once one, this time with "AMENDED" in the exhibit name as opposed to in the file name.

Sincerely,

**Ron Backlund, M.Eng.**
