Attention: Mr. Frank Coperich

**Subject: Type Acceptance Application under FCC CFR 47, Parts 2 and 22 (Subpart H) - Cellular RadioTelephone Service in the frequency bands 824-849 MHz (Uplink) and 869-894 MHz (Downlink) (25 kHz Channel Spacing).**

**Applicant: Kaval Telecom Inc.**  
**Product: Bi-Directional Amplifier**  
**Model: BDA1200**  
**FCC ID: H6M-BDA1200**

Dear Sir/Madam,

As per your approval on Nov. 22, 1999, we would like to submit the additional test data to update the FCC grant to include the EUT's operation in the Cellular bands; 824-849 MHz, 7 Watts max., 75 dBi Gain max. (Mobile) and 869-894 MHz, 12.3 Watts max., 80 dBi Gain Max. (Base). However, after we sent the additional test report to you, the update of information was not reviewed and updated. Therefore, we would like to submit this report to you under FCC Class II Permissive Change.

The only differences between among different EUT's configuration for operating in frequency bands are: (1) Different Duplexers and Reject Filters, (2) Boosters use different internal Dielectric Filters.

The revised manual including new specification of the radio to meet FCC Part 22 is shown on pages 7, 8 & 17 of the User's Manual, Rev. 8

If you have any queries, please do not hesitate to contact us by our TOLL FREE numbers:
