Subject: Extended Frequencies Justification
Gentlemen:

The H78BSR100N was designed to operate in the frequency bands 136-174 MHz.

To aid equipment authorization in other countries that accept the United States FCC Grant of Certification, this will service as a request that the FCC list the frequencies of (136-174 MHz) under the FCC Rules Part 90 on the FCC Grant.

Equipment programming is the responsibility of Authorized Service Personnel only. In addition, the radio complies with 47 CFR Part 90.203(e) in that the operator cannot directly program the transmit frequencies using the normally accessible external controls.

Per the FCC's KDB634817 guidance, as an alternative to listing the exact frequencies, we acknowledge that it's a violation of the FCC Rules if this device operates on unauthorized frequencies.

(Example for VHF Frequencies shown below)

Table with 5 columns: FREQUENCY RANGE (MHZ), RULE PART, RULE PART (IF APPLICABLE), FEDS, EMISSION DESIGNATORS. Rows include frequency ranges like 136-150.8, 150.8-161.6250, 161.6250-161.7750, 161.7750-173.4, and 173.4-174.
