

05/11/2017

Class II Permissive change is based on FCC ID: H78KPMTPIT. The new FCC submission for 151MHz and 156MHz frequency range is based on the same units i.e. hardware and software that have been tested and approved by TIMCO which was qualified for FCC ID: H78KPMTPIT.

There have been no hardware changes to the device; the changes made to add the frequency range were via software only.

The new submission is just for different VHF frequencies (defined by the KP factory) while the 2.4GHz ISM band radio wasn't change i.e. the 2.4GHz radio parameter are fixed and can't be changed even at the production line.

Yoram Kenig

A handwritten signature in black ink, appearing to read 'Yoram Kenig', written over a horizontal line.
