RE: Attestation of Indoor Access Point Operation (6ID)

FCC ID: H8N-ASK-NCM1100

Dear Examiner,

We, Askey Computer Corporation, attest that this device under FCC ID: H8N-ASK-NCM1100 complies with device protocol requirements and operational restrictions for Indoor Access Point Devices (6ID).

1. The method used by this indoor access point to control the associated client/subordinate power control is as follows: This indoor access point can act as a master as defined in Section 15.202, allowing it to transmit without receiving an enabling signal. This mode can select a channel and initiate a network by sending enabling signal to client devices and subordinate devices.
2. This Low-power Indoor Access Point operates in the 5.925-7.125 GHz band. It is supplied power from a wired connection, has an integrated antenna, is not battery-powered, and does not have a weatherized enclosure.
3. We acknowledge this device is subject to and in full compliance with the device restrictions listed below. All users are notified of these restrictions through the user manual.
 - This Indoor Access Point operating in the 5.925-7.125 GHz band shall be supplied power from a wired connection, has an integrated antenna, is not battery powered and does not have a weatherized enclosure.
 - This device's operation will not be allowed on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.
 - This device is that prohibited for control of or communications with unmanned aircraft systems, including drones.
4. This device employs a Contention-Based Protocol as demonstrated in the test report.
