# Multi-Sensor Camera

QB-MSC-FXL

WWW.shiftcontrolplay.com

## What's in the box
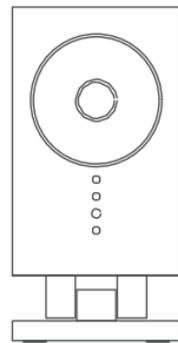

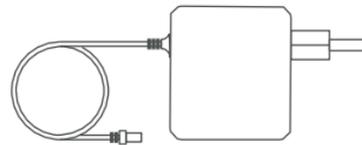

Multi-Sensor  Camera        Power  Supply

## 1 Set-up Camera

Power  ON/OFF        WPS – 2 seconds
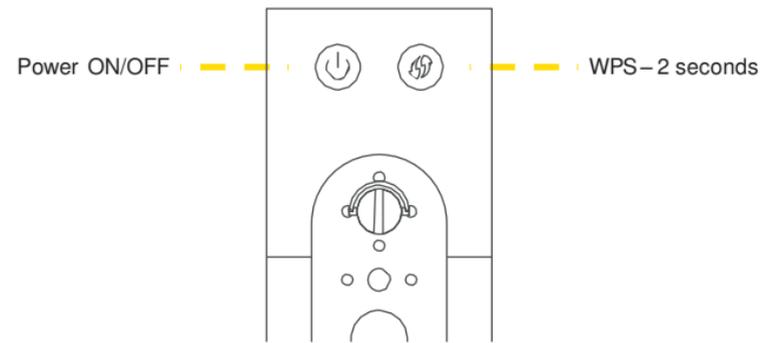

Plug your QBee Camera into a power outlet.
Power it on. Wait for 60 seconds
Press the WPS Button  for 2 seconds – LED blinks white.

## 2 Connect it to Gateway
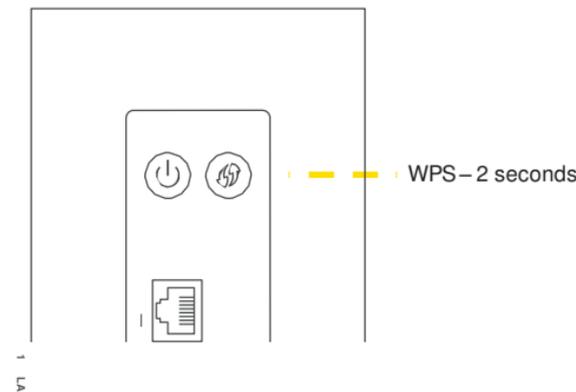

WPS – 2 seconds

Press the WPS Button  for 2 seconds – LED blinks white.

Once the pairing is successful the LEDs of the Camera and
Gateway change to solid white.

The Camera will appear on your mobile  and/or  TV screen.

# Troubleshooting

## Reconnect Camera

In case the Camera loses the connection to your QBee Gateway, they have to be paired with the Gateway again.

Pairing – To do so, press the WPS button of your QBee Gateway for 2 seconds. The LED on the Gateway will start blinking in white.

Then press the WPS button on the Camera for 2 seconds. The LED on the Camera will start blinking in white. When the pairing is done, the LED will light solid white.

If the pairing of the Camera does not work, please reset your Camera by pushing the WPS button for 10 seconds. This will restore your Camera to factory settings. Once the reset is complete, please repeat the Pairing process.
