SAFETY INFORMATION

In order to maintain compliance with the FCC RF exposure guidelines, this equipment should be installed and operated with minimum distance [20cm] between the radiator and your body. Use only with supplied antenna. Unauthorized antenna, modification, or attachments could damage the transmitter and may violate FCC regulations.

CAUTION! Any changes or modifications not expressly approved in this manual could void your authorization to use this device.

WIRELESS DUO DEVICE CARE

- Please fully charge your Wireless Duo until the power indicator goes out before first use.
- Do not attempt to open your Wireless Duo device casing. There are no user serviceable parts inside and you might damage sensitive electronic circuits and components. Unauthorized disassembly will void the warranty.
- Do not leave your Wireless Duo device exposed to strong sunlight or excessive heat for a prolonged period. This may damage it.
- Do not handle your Wireless Duo device with wet hands or expose it to moisture or liquids of any kind. Continuous changes from a cold to a warm environment may lead to condensation inside your Wireless Duo device, resulting in corrosion and possible damage.
- If you pack your Wireless Duo device in your suitcase during travel, beware of damage. Cramming a suitcase may crack the device. Remember to switch off your wireless connections during air travel.
- Use your Wireless Duo device in an environment with ambient temperatures between5°C and 35°C.

THE BATTERY

CAUTION! Risk of explosion if battery is replaced by an incorrect type Dispose of used batteries according to the instructions

Your Wireless Duo is equipped with a high performance non-detachable Li-ion battery. Observe the maintenance guidelines for a longer battery life.

- Avoid charging in extremely high or low temperature.
- Do not try to remove or replace the battery.
- Do not use any cell or battery which is not designed for use with Wireless Duo.
- Never try to open the battery as it contains substances that might be harmful if swallowed or allowed to come into contact with unprotected skin.
- Do not remove and short-circuit the battery, as it may overheat and cause a fire. Keep it away from metal objects.
- Do not remove and dispose of the battery (or Wireless Duo) in fire. It could explode and release harmful substances into the environment.
- Do not remove and dispose of the battery (or Wireless Duo) with your regular household waste. Take it to a hazardous material collection point.
- In the event of a cell leaking, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice.

THE CHARGER

- Do not use any charger other than that specifically provided for use with Wireless Duo.
- Do not leave a battery on prolonged charge when not in use.
- Never pull the charger cord to release it from the mains pull the charger itself.

FEDERAL COMMUNICATIONS COMMISSION STATEMENT

This device complies with Part 15 of the Federal Communications Commission (FCC) Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION! Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

RF EXPOSURE INFORMATION (SAR)

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the EUT transmitting at the specified power level in different channels.

The highest SAR value for the device as reported to the FCC is 0.475 W/kg when placed next to the body.

REACH

Complying with the REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals) regulatory framework, we published the chemical substances in our products at ASUS REACH website at http://scr.asus.com/english/REACH.htm
