Dist., New Taipei City, Taiwan

Federal Communications Commission
Authorization and Evaluation Division

7435 Oakland Mills Rd
Columbia MD 21046-1609

Date: April 27, 2021

Subject: Letter of Declaration on LPI Operation

FCC ID: H8N-CME1000

Product Name: Wi-Fi Extender Mini

To whom it may concern:

We the undersigned, hereby attest that this device complies with the following requirements of Part 15 E of the FCC's rules for the 6GHz bands:

- a.) this device will always be under the control of a low-power indoor AP and will only initiate brief messages to be under the control of an indoor low-power AP. These brief messages will only occur if the subordinate has detected a low-power indoor AP operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- b.) once under control of an indoor access point, a subordinate will initiate connections with clients, other access points, or other subordinate devices at a lower power or equal to the power advertised by the access point controlling the subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6PP.
- c.) the transmission will be lower or equal to the power advertised by the indoor low-power access point or subordinate.

An 11ax IEEE device's Transmit Power Envelope element has information fields for power limits for connecting client/subordinate devices. The TPE information is contained in this device signals and used by connecting client/subordinate to ensure that it knows the regulatory TX powers it is allowed to transmit at. There is a regulatory info field in this device beacon and probe response frames which details this device type when the client/subordinate associates to this device.

- d.) The installation guide will include the operation of this device will not be allowed on oil platforms, cars, trains, boats, and aircraft, except that this device's operation is permitted in large aircraft while flying above 10,000 feet.
- e.) This device will not be used for control of or communications with unmanned aircraft systems, including drones.
