Driver Installation

This chapter covers the installation of device drivers in the Windows XP environment. The step-by-step instructions provided in this chapter will help you install and configure the following drivers:

1. Video Adapter

2. Sound Controller

3. Network Adapter

4. PCMCIA Controller

5. Mouse (Touchpad)

6. Modem

7. Combo (Modem + Wireless Network (IEEE 802.11b) Adapter)

   You can also perform a BIOS Update from the driver CD.

   Insert the driver CD into the CD-ROM drive. The Driver Installation Guide will appear automatically. Follow the instructions in the Guide, or those below, to install the driver you want.

   Video Adapter

   Sound (Audio) Adapter

   Network Adapter

   PCMCIA Controller - Cardbus Controller

   PCMCIA Controller - ATA Patch

   Mouse (Touchpad)

   Modem (for modem-only mini-PCI card equipped CY-25)
   Combo (Modem + Wireless Network (IEEE 802.11b) Adapter) (for combo mini-PCI card equipped CY-25)

   BIOS Update

Video Adapter

1. Click the link in the Driver Installation Guide. The following dialog box will appear.

   Top

BIOS Update

1. Insert a bootable floppy diskette into the FDD.

2. Click on the Start menu and select Windows Explorer.

3. Select "My Computer".

4. Open the Bios folder on the CD-ROM.

5. Select each of the files in the BIOS folder. Right click **Send To** and then then choose 3½ **Floppy**.

6. Boot laptop computer from the floppy diskette mentioned in Step 1.

7. Make sure the AC adapter is connected and run the **CBIOS rom_file** from the DOS prompt.

8. The program will start to update BIOS and reboot automatically.

9. Press F2 to enter BIOS Setup Menu then press F9 to load default settings of factory. Press F10 to save settings and exit.

   If, for some reason, you cannot access the Driver Installation Guide, you can also launch any of the setup programs in the following way:

1. Make sure the driver CD is in the CD-ROM drive.

2. Click the Start button on the Windows desktop, then select Run…

3. **Either**: Use **Browse** to locate the setup file for the driver you want. The
    The setup files for each driver are stored in the driver's separate
    directory on the disk. Assuming the CD-ROM Drive letter is "D", the
    setup file locations are:

    ⇨   D:\Audio\Setup.exe

    ⇨   D:\Combo\Setup.exe

    ⇨   D:\Modem\WinXP\Setup.exe

    ⇨   D:\PCMCIA\Cardbus\Setup.exe

    ⇨   D:\PCMCIA\ATAPatch\enecbpth.exe

    ⇨   D:\Touchpad\Setup.exe

    ⇨   D:\Video\Setup.exe

    Or: Type in the setup file location.

4. Now click OK. The setup program will launch. Follow the screen-by-
    screen instructions to install the driver.

5. When prompted, select "Yes, I want to restart my computer now." Click
    Finish to complete the installation. Your computer will restart with the
    new video driver properly installed.
