

May 14, 2013

Federal Communications Commission
Office of Engineering and Technology
Equipment Authorization Division
7345 Oakland Mills Road
Columbia MD 21046

Subject: Approval of FCC ID: H9P2090

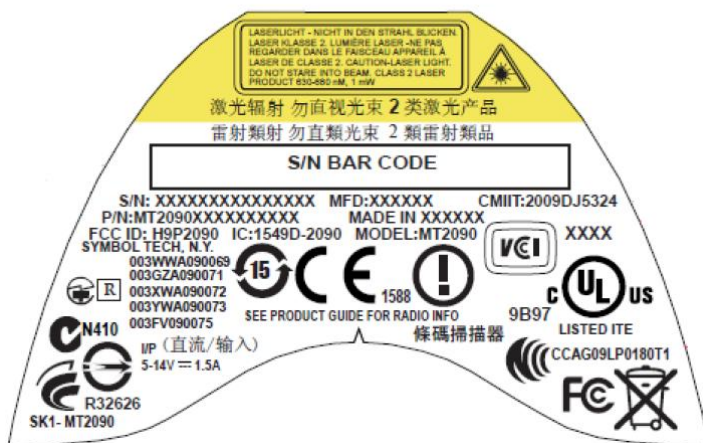

To the Commission,

This device was originally approved in 2009 with the approval being done by verifying existing approved collocated radio modules were compliant.

In an effort to reclaim label real-estate necessary for markings required by other countries; it is Motorola's desire to have the product certified under a single id.

No changes or modifications have been made to the design since its introduction. The original test results continue to represent the operation of this device.

MT-2090 Proposed Label

Respectfully,

Mark S. Luksich

DMTS, Regulatory Engineering
