Federal Communications Commission  
Authorization and Evaluation Division

RE : Request for a Class II Permissive Change  
FCC ID : H9P2090

We, Zebra Technologies Corporation, hereby declare that we are only and fully responsible for this CIIPC application of FCC ID: H9P2090, originally granted on 05/20/2013. Now we would like to modify the authorized equipment to update 5G Function under New UNII rules.

For further justification, since the original UNII application was combining the certified WLAN module (FCC ID: H9P2192955), only the updated test report (report number: RF960308H04H-1) of the mentioned module will be submitted along with this CIIPC application. The testing of the module is sufficient for this device under the evaluation according to KDB#996369 D01 test condition requirements. In addition, the radio module updated to the New UNII rule was already documented via CIIPC.

Except for the changes mentioned above, no other modification is performed. Also, the change does not have any impact on the approved radio parameter such as power, frequency range, modulation etc.

Should you have any question, please contact me directly.

Regards,
