

FCC ID: H9P2121160

Request Letter

October 26, 2004

To whom it may concern,

We, **Sporton International Inc.**, are authorized by the applicant/ manufacture, **SYMBOL Technologies, Inc.** to handle all the processes required under FCC limited module approval authorization. This project is searching for the authorization of Class II change of the pre-certified module which is specific to mobile host equipment. In this filing Symbol would like to add PDA (named mobile computer) as the allowed Portable host equipment for this RF module. Per your response to Dr. Lane of Sporton International Inc. via LabHelp@fcc.gov dated August 24, 2004 and with subject "EMC test requirement in Class II change filing", such filing is legal but we prefer to re-test all the items defined in the rule parts for making sure all the requirement has been fulfilled.

Here is the short message for the pre-certified module:

Product Name: **802.11a/b/g RLAN module**
Model Name: **21-21160**
FCC ID: **H9P2121160**

Should you have any questions or comments regarding to this matter, please have my best attention.

Sincerely yours,

Dr. Alan Lane

Vice General Manager
SPORTON International Inc.
