RE: Request for a Class II Permissive Change for – FCC ID H9PCC4137

To the Commission:

This is a request for a Class II Permissive change for the device approved under H9PCC4137. The radio has been integrated into a host device; at the direction of Rich Fabina, the device was tested for SAR, Spurious Emissions, and EIRP to ensure continued compliance to the original grant. The final product configuration uses a Cognitive dipole. The device with the radio in the final configuration is compliant to SAR, Spurious Emissions, and EIRP for this type of device.

If there are any questions about this authorization, please contact me at (561) 487-1718.

Sincerely,

A handwritten signature in cursive script that reads "Mark S. Luksich".
