To FCC

Evaluation of Class II Permissive Change to the LA4137 module for the addition of the PS3050 Host
FCC id: H9PLA4137

I have evaluated the submission and find it compliant.

During the evaluation the following clarification was made :

The equipment is described as a hand held device but an RF exposure test report has been submitted in which measurements have been taken at zero separation.

The applicant has declared that although the equipment is intended to be operated in the hand, the nature of its use in public areas is such that –

- A separation of more than 20cm cannot be maintained between the equipment and nearby persons.
- The device could be used by younger members of the population.
- Ergonomically the natural position of the device allows it to be used at a distance closer than 20cm from the body.

The equipment has therefore been evaluated as a portable device.

Yours sincerely

Bill Wilson

Technical Certifier
