Output power is ERP for Part 22 and EIRP for Part 24. This device contains functions that are not operational in U.S Territories. This filing is only applicable for US operations. Collocated transmitter operating configurations have been evaluated as described in this filing; other collocation configurations require separate evaluation. SAR compliance for body-worn operation is limited to the specific belt-clips / holsters / accessories tested for this filing. End-users must be informed of the body-worn operating requirements for satisfying RF exposure compliance. The highest reported SAR values for single- and co-transmit configurations under this FCC ID are: Part 22 Head: 0.545 W/kg; Body-worn: 0.844 W/kg; Part 24 Head: 0.205 W/kg; Body-worn: 0.423 W/kg; Part 15 Head: 0.003 W/kg; Body-worn: 0.002 W/kg.

20: All electrical and mechanical devices employed for spurious radiation suppression, including any modifications made during certification testing, must be incorporated in each unit marketed.
