**Overall Letter in support of Class 2 Permissive Change to Symbol Product M9062A
FCC id: H9PMC9062A**

This product consists of the following 3 Radio transmitters :

- A PCT Dual band 850/1900 GSM Transmitter
- A DSS RLAN 802.11 Transmitter
- A DSS Bluetooth Transmitter

This was approved by BABT as TCB in a configuration which did not support simultaneous transmission .

This Permissive Change covers the minor software modification to lift that inhibition for the following combinations of transmitter:

- PCT 850 and RLAN
- PCT 850 and Bluetooth
- PCT 1900 and RLAN
- PCT 1900 and Bluetooth
- RLAN and Bluetooth.

The Enclosed test reports demonstrate that neither the overall SAR nor spurious transmissions have been significantly changed by this modification.

The following has been noted:

1: Introduction to Report OR611524/06 Issue 1

This erroneously refers to GSM/GPRS 850 and should state GSM/GPRS 1900.
The remainder of the report correctly refers to part 24 and the 1900 MHz frequencies.

Yours sincerely

Hilton Carr
